Ayman El Didi

(780) 616-8682 | https://github.com/aeldidi
ayman@eldidi.org | https://ayman.eldidi.org

Backend-leaning full-stack developer owning production rental and logistics systems in ASP.NET, Go, and Rust. Leads API integrations with Lightspeed Retail R-Series, builds automation and infrastructure on Linux, and specializes in high-impact performance and reliability work.

WORK EXPERIENCE

Software Developer, Med Supplies (Vine Media inc.)
Edmonton, Alberta ····· *Nov 2024 — Present*

- Built automated overdue rental detection system reclaiming **tens of thousands of dollars annually**
- Implemented live per-location inventory enabling **sub-hour deliveries** for high-profile clients
- Sole in-house developer for a mission-critical rental platform with real-time, location-based inventory serving Edmonton hospitals (ASP.NET Core, EF Core, React, TypeScript, MySQL, Redis, Lightspeed R-Series API)
- Work directly with Lightspeed product and engineering teams, providing API feedback and delivering technical presentations
- Automated manual workflows with Playwright, **saving hours per day**, and built AWS-based document digitization pipeline for thousands of records

Lead Software Developer (Concurrent Contract Venture), ATG Sports
Edmonton, Alberta (Remote) ····· *Jan 2025 — Nov 2025*

- Led 5-person team developing scouting and operations platform using ASP.NET Core, React Native, Expo, PostgreSQL, Redis, and Render.com
- Owned architecture and majority of codebase; coordinated directly with founder, project management, and major stakeholders and helped coordinate transition to partner firm after project completion
- Performed full performance overhaul: **21% overall improvement**, **5x speedups** on critical endpoints, and **50% cloud cost reduction**
- Built high-volume web scraper and served as primary technical advisor to founder; received formal letter of recommendation
- Worked evenings and weekends concurrently with Med Supplies role

Software Developer (Contract work done during school), Berry Homes
Edmonton, Alberta (Remote) ····· *May 2023 — Sept 2023*

TECHNICAL SKILLS

- **Languages:** C, C++, C#, Rust, Go, Python, Java, JavaScript, TypeScript, Bash/POSIX Shell
- **Backend & APIs:** ASP.NET Core, Axum, Flask, Go Standard Library, RESTful APIs
- **Web & Mobile:** React, React Native, Expo, Android (Java)
- **Data:** MySQL, PostgreSQL, SQLite, Redis
- **Infrastructure & Tooling:** Linux, Docker, Docker Compose, Nix, VPS Administration, Playwright, Git, GitHub, CI/CD, Nginx, Caddy, Lightspeed R-Series API

OPEN SOURCE, SYSTEMS & PERFORMANCE RESEARCH

Unicode ID Trie RLE Compression & Benchmarking (Rust) ····· *https://github.com/aeldidi/unicode-id-trie-rle*

- Implemented compressed Unicode ID trie with **35% less static storage** than leading library with competetive performance; ported to C and Go
- Performed cache-aware microbenchmarks across multiple datasets
- Authored a detailed technical writeup: https://ayman.eldidi.org/articles/unicode-identifiers

AlbumArt.digital — High-Resolution Album Art Search Engine (Go) ····· *https://albumart.digital*

- Source code: https://github.com/aeldidi/albumart.digital
- Dependency-free Go web service integrating directly with Apple Music API for high-resolution album art

EDUCATION

University of Alberta ····· *BSc Double Major in Computing Science and Mathematics, Sept 2019 — Apr 2024*
